Burhanuddin Chitalwala

Full-Stack Engineer | AI / LLM Systems | Next.js, Java, Python

+91 8452959340 | burhanuddinchital25151@gmail.com | LinkedIn | GitHub | Bengaluru, India | **Open to relocation: UAE (Dubai)**

SUMMARY

Full-Stack Engineer with **3+ years** building and shipping AI-powered products at global companies (**InMobi, Stellantis**). Own features end-to-end across Java/Python backends and Next.js/React frontends, with production LLM systems shipped in a live vehicle. Strong in AI integration, scalable SSR web platforms and design systems, with a track record of measurable business impact. Seeking an **SDE 2** role at a product company in the UAE.

TECHNICAL SKILLS

- **Languages:** Java, Python, TypeScript/JavaScript, Kotlin, SQL, PHP
- **Frontend:** Next.js, React, Tailwind CSS, shadcn/ui, Radix UI, design tokens & design systems, SSR/SEO
- **Backend:** Node.js, FastAPI, REST APIs, Prisma, OAuth
- **AI / LLM:** OpenAI API, GPT-4o, Gemini, DeepSeek, Claude, Realtime AI, RAG, AI agents, prompt engineering, hallucination guardrails
- **Data & Cloud:** PostgreSQL, Supabase, MySQL, MongoDB, Vercel
- **Practices:** System design, Data Structures & Algorithms, SOLID, OOP, MVVM, Git, AI-assisted development (Claude, Cursor)

EXPERIENCE

Full Stack Developer | InMobi, Bengaluru Jul 2025 – Present

Global AdTech leader for intelligent, data-driven advertising

- Building an **omnichannel performance-marketing platform** where an AI chat layer generates media plans, market research and optimised campaign and budget strategies for advertisers; own features end-to-end across Java/Python services and the Next.js frontend.
- Building the **GTM-ready UI revamp** on a layered design system (primitive and semantic tokens, shadcn/Radix primitives, composite components, layouts), modernising the product under tight deadlines without disrupting the live implementation.
- Led frontend development of the **server-side-rendered ad publishing platform** (Next.js, TypeScript, Tailwind), improving SEO performance and campaign management efficiency.
- Built an internal **AI tool using Claude** that turns client-meeting minutes into structured signals and action items, replacing hours of cross-team discussion with reusable product insights.

Software Developer | Stellantis, Bengaluru Feb 2024 – Jul 2025

Global automotive manufacturer

- Built an **AI-powered in-car voice assistant** integrating GPT-4o, Gemini, DeepSeek and Realtime AI across a 14-feature suite, now live in the Citroën Basalt X; its subscription model is projected to generate **$786M+** in revenue.
- Developed **Alexa Skills** for voice-controlled vehicle operations across **14 brands** (Jeep, Maserati, Alfa Romeo and more).
- Built responsive multimodal interfaces for Echo Show devices, increasing user engagement by **27%**.
- Refactored core systems for MVVM compliance and reusability, saving **20 engineering hours per sprint**.

Software Developer Intern | ITR Consulting, Illinois, US (Remote) Jul 2023 – Jan 2024

- Built a high-traffic web application (Laravel, Vue.js) serving **2,000+ daily users**, using MVC architecture and REST APIs to improve cross-platform UI responsiveness.

PROJECTS

Bhendi Bazaar – Multi-Tenant Commerce Platform | bhendi-bazaar.com Live

- Built and launched a full-stack e-commerce platform (**Next.js, TypeScript, Prisma, Supabase/PostgreSQL, Vercel**) giving small businesses their own branded storefront and business landing page, with inventory management and an org portal for order tracking.
- Implemented the complete buyer flow (catalogue, cart and checkout) with orders routed to each seller's dashboard; live in production with a real seller listing products.
- Designing **AI-assisted marketplace listing** that stores each seller's business context once (products, materials) and reuses it to generate listings for Amazon, Flipkart and Meesho.

CredDev – AI Credibility Layer for Developers | cred-dev17.vercel.app Live

- Built a full-stack AI platform (**Next.js 16, FastAPI, PostgreSQL**) that aggregates developer data from GitHub, LeetCode, LinkedIn and 15+ platforms to generate credibility reports with OpenAI GPT, backed by a **7-point anti-hallucination guardrail system**.
- Engineered a real-time **12-state chat agent**, progressive OAuth authentication and graceful degradation across multi-platform data fetchers, following SOLID principles.

EDUCATION

B.Tech, Computer Science and Engineering | Vellore Institute of Technology (VIT) CGPA: 7.9
